

HOW TO REDO

Picture Frames

Don't spend big bucks on picture frames. Easily redo old picture frames to fit your style for cheap.

1 Use spray paint

Easily transform picture frames with a coat of spray paint. Spray paint works wonders on metal, wood and plastic picture frames. Give picture frames a uniform look for a gallery wall by spray painting them the same color. Black or white works best.

2 Try milk paint

Give picture frames a rustic look with milk paint, an all-natural water-based paint that comes in a powder. Apply milk paint in smooth, even strokes. There's no need to sand first! Milk paint naturally crackles as it dries.

3 Swipe on a coat of regular paint

Use leftover wall paint or even craft paint to give picture frames a new look. It's amazing what a difference a coat of paint can make.
